I.0 GENERAL INFORMATION

The General Information section will explain the general terms the FITORNOT application overview and the sections of the user manual.

1.1 Application Overview

“FitOrNot” – A mobile application that allows users to input their measurements and determine their recommended size based on a brand’s specific sizing chart.

1.2 Organization of the Manual

The user manual consists of the following four sections

1. General Information
2. System Summary
3. How to download the application
4. Registered Users – Privileges

General Information – Explains in general terms the FitOrNot application overview and the sections of the user manual.

System Summary – Explains the hardware and software requirements for accessing the FitOrNot mobile application and user access levels.

How to download the application – Explains the available ways to download the FitOrNot iOS application on your mobile device.

Application Use – Explains and provides the user when registered all the functionalities of the FitOrNot mobile application.

2.0 SYSTEM SUMMARY

The System Summary section will explain the hardware and software requirements for accessing FitOrNot mobile application and the user access levels.

2.1 Hardware and Software Requirements

To utilize FitOrNot you will be required to have a smart phone device running iOS. The minimum iOS version should be 14.0 and up to avail all the features in the mobile application. You will be required to have an internet connection on your mobile device to download and use all functionalities within the application.

2.2 User Access Levels

There are two types of roles in the FitOrNot application.

1. Registered Users
2. Google Users

1. Registered User

A registered user is one who registers themselves in the FitOrNot mobile application by filing the registration form. A registered user can measure themselves, receive potential fits, view their size, filter between clothing categories, view current deals, etc.

2. Google User

A Google user is one who register themselves in the FitOrNot mobile application by using the google sign in method by creating an account with their google email. A google user can measure themselves, receive potential fits, view their size, filter between clothing categories, view current deals, etc.

3.0 HOW TO DOWNLOAD THE APPLICATION

FitOrNot mobile application can be downloaded through the following ways

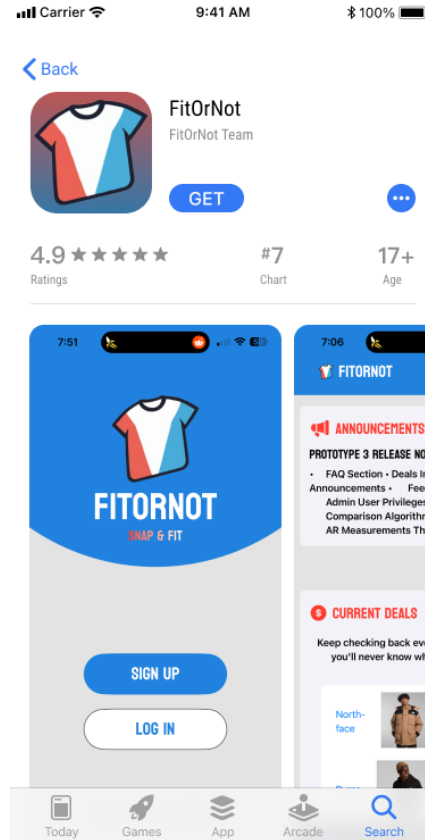

- Apple App Store
- GitHub

3.1 Apple App Store*

Open the Apple App Store application on your smartphone by tapping on the Apple App Store icon as shown in the image below.

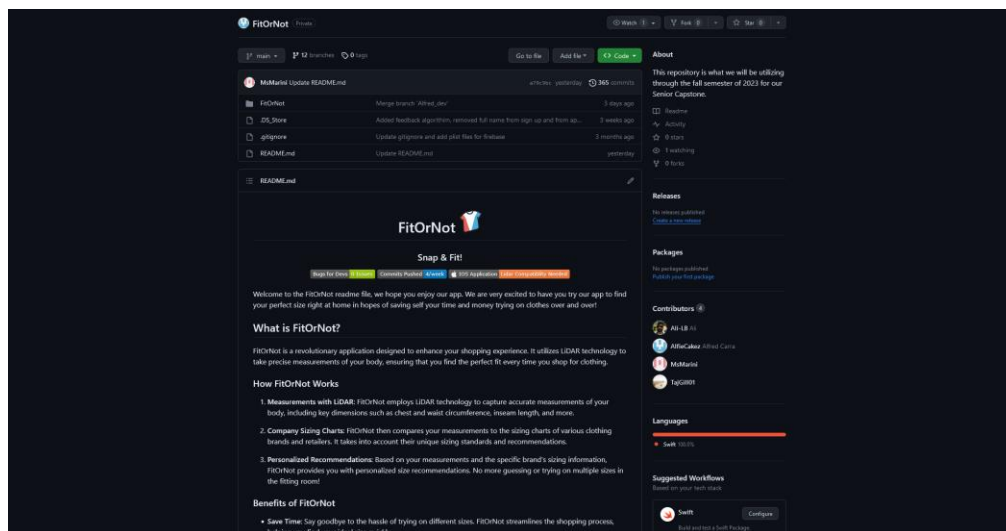

Tap on the Apple App Store search icon at the bottom and enter the text “FitOrNot” in the search bar. Tap on the FitOrNot mobile application icon from the search result. Tap on the “Get” button to install the application.

*Once our application gets approved you will be able to download the app from the Apple App Store in the meantime, please review GitHub for installation.

3.2 GitHub

Visit our GitHub page at <https://github.com/AlfieCakez/FitOrNot> to pull our application source code to review it yourself on Xcode and to run it using your own bundle identifier and Apple Account.

4.0 REGISTERED USER – PRIVILEGES

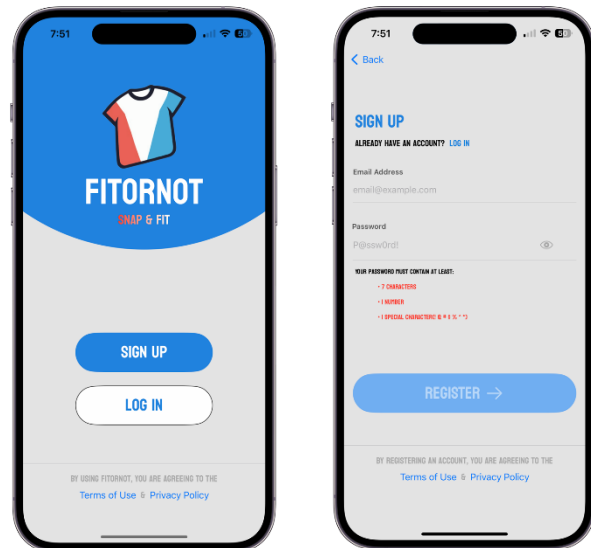

The following features can be made available by the registered user.

- Viewing announcements
- Checking current deals
- Measuring
- Personal Profile
- Manual Measurement Input
- Brands
- View Personal Size
- View List of Products
- FAQ
- Settings

4.1 New User Registration

A Registered user can avail more benefits than having no registered account as all features will be behind a registration wall. Hence it is recommended users register themselves to access the features services.

A user can register on the FitOrNot application using the “Sign In” option available on the Splash Screen. If you are a new user, select “Sign Up” to register. Fill in all the required details and Tap “REGISTER” to submit. On successful validation the user will be registered, and a message alert will be sent to the mobile device.

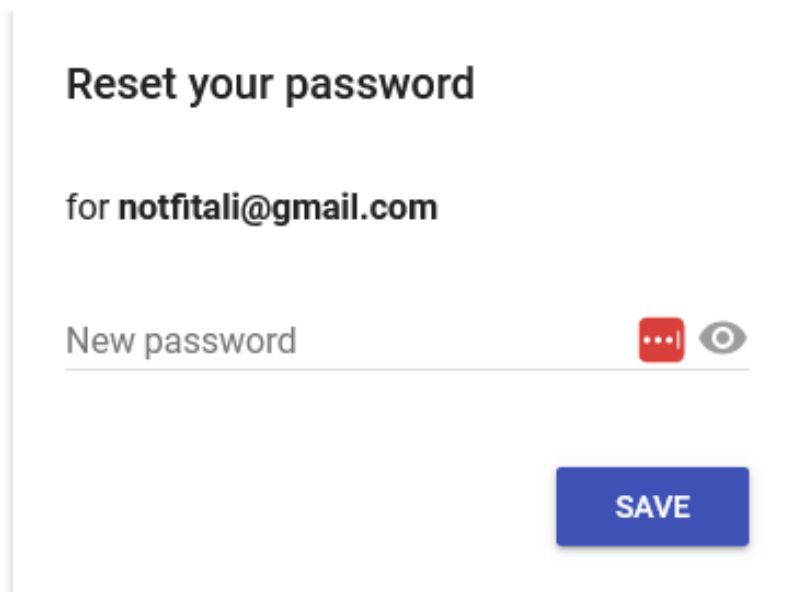

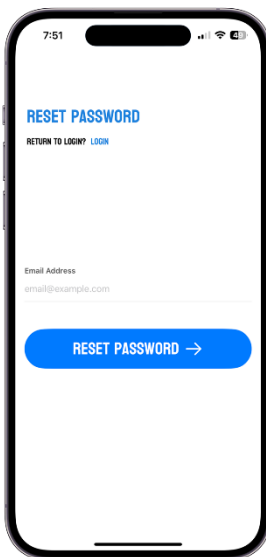

4.2 Existing User Login

To log into the mobile application, tap on the “Log In” option from the Splash Screen. Enter an email address and password to login. On successful login, the user will be redirected to the home page screen. If you want to login using the google sign in method, you will be able to register a new account and log into that account using your google email account directly from the login page.

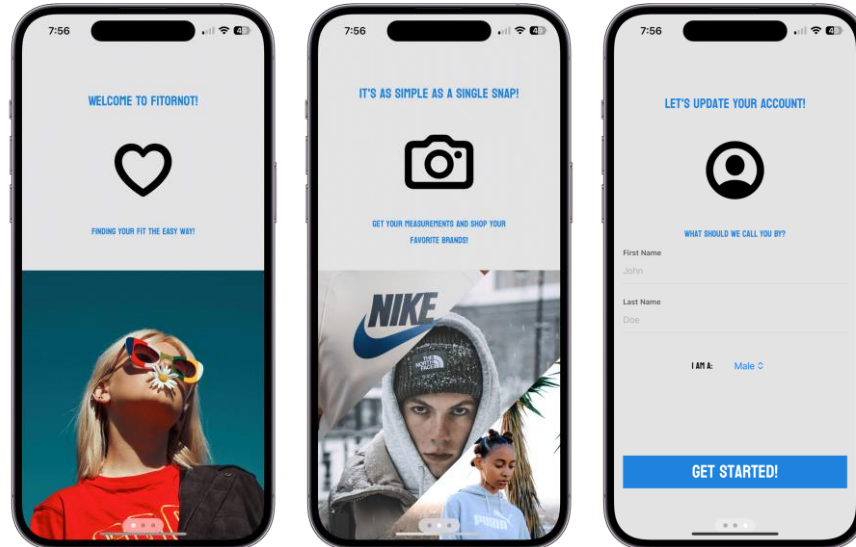

Forgot Password

The reset password feature can be available on the “Forgot Password” text link on the Login screen. On tap of the “Forgot Password”, users will need to give a registered email to submit for resetting. If the given email id is valid, an email will be sent that contains instructions for users to reset their own password following a link. The user will then reset to their password of choice.

Onboarding

If this is your first-time logging in this will trigger the onboarding experience. As the user you will be able to navigate through three different screens all offering insight into what our application has to offer. With the ability to enter a first name, last name, and gender picker to update your personal profile. Make sure to fill these out to your liking to better personalize your experience!

4.3 Home

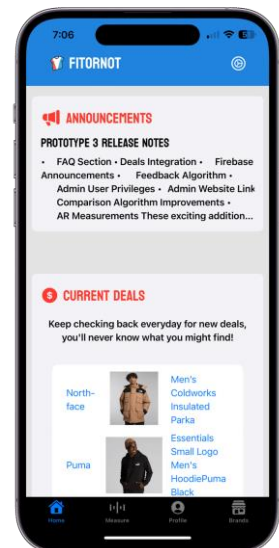

The home page offers a few features that can be accessed and viewed. We have both the announcements and current deals from brands you might know and love.

Announcements

The Announcements feature in the FitOrNot mobile application serves as a communication tool for the FitOrNot Team to broadcast important messages, updates, or information directly to users. This feature is instrumental in keeping everyone informed about a new feature, promotions, or any other detail related to the FitOrNot mobile application.

Current Deals

The Current Deals feature in the FitOrNot mobile application is a dynamic section that showcases products currently being offered at discounted prices or promotional rates. This feature allows users to quickly take advantage of ongoing sales, making their experience easier.

4.4 Measure

The measure page is the main feature on FitOrNot. This utility feature allows users to measure each part of their own body building a portfolio of their measurements.

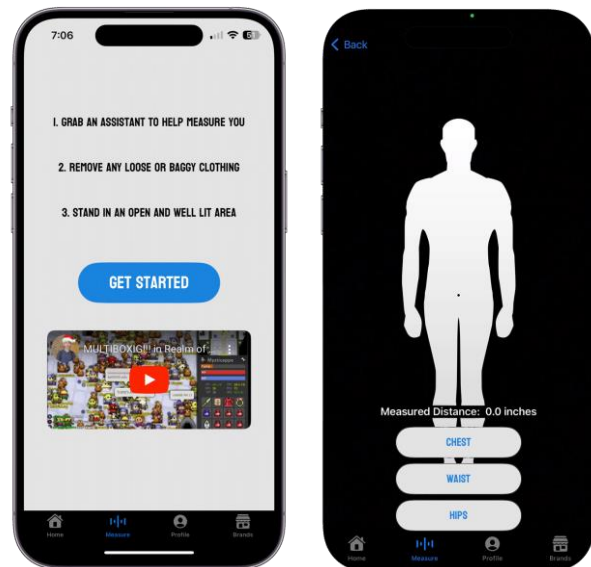

Instructions

We have provided an instructional tab on the measuring page for all users to familiarize themselves with instructions to measure.

An iPhone with LiDAR support will be required to use this feature. iPhones without LiDAR support can still use the manual measurement feature to find their size.

Within each part of the body users can place 6 dots around the subject to better get an accurate measurement.

Once all body parts have been set and submitted to the profile users can look at their personal profile with the same measurements.

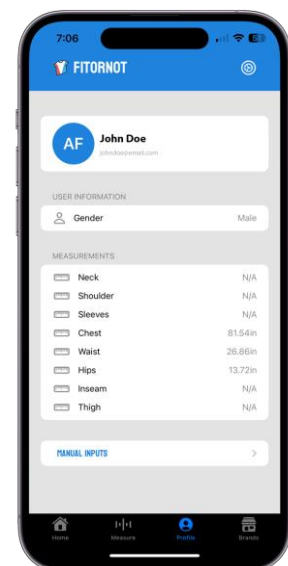

4.5 Profile

The profile page is where users can find their personal measurements, name, and email associated with their account.

Personal Profile

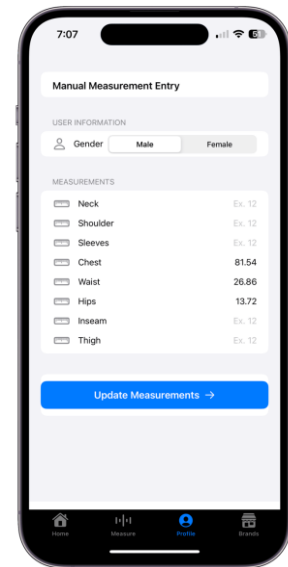

Every section of the body part measurement can be found here in inches. You can either use the measurement feature in the FitOrNot mobile application to grab those measurements yourself or if you do not want to or do not have a LiDAR compatible iPhone you may manually input your measurements for each body part.

Manual Measurement

To access this page, navigate to the “Profile” tab and tap on the “Manual Inputs” button down below, from there you will be able to input measurements you have taken yourself as well as changing the gender of your profile if you made a mistake on the Onboarding experience or just want to check out the difference in your size.

One thing to note is that measurements saved to the profile will all be measured in inches, if a measurement seems off when looking at your size when viewing a product, you will be informed that your size might be off. Make sure to correctly measure around the radius of the body part you are measuring. Once satisfied with your measurements tap on the “Update Measurements” button below.

4.6 Brands

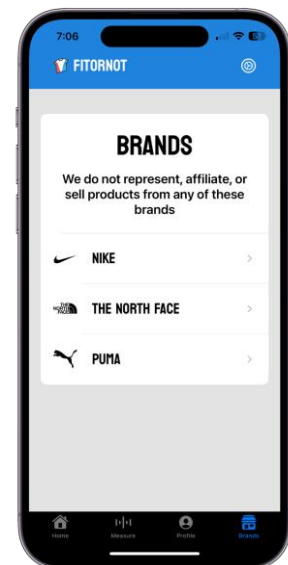

Users will be able to find a shop from a wide variety of brands in their recommended sizes based off the measurements on the personal profile. Users will be able to look for hoodies, shirts, and bottoms all in the palm of their hands.

Brands

With an ever-growing list users will be able to navigate through many of the large retail brands that they both love for both comfort and style. Each brand is currently outfitted to offer three distinct categories of products that the user can decide on by first tapping on any brand that they want to shop for.

Brands currently offered*:

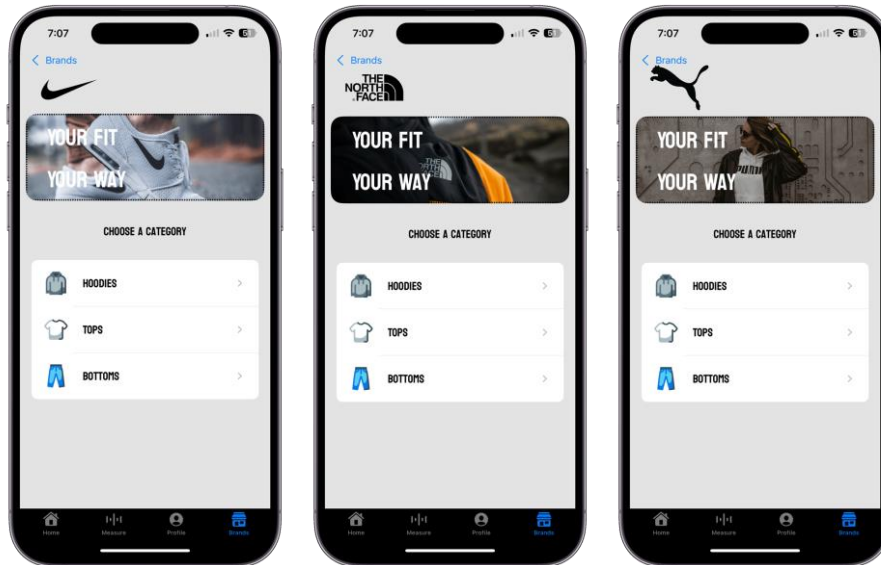

- Nike
- The North Face
- Puma

*As of this update on the digital user manual these are the current retailers, we offer to better your experience.

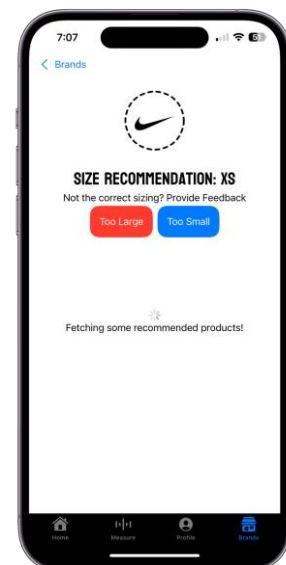

Try tapping on any retail brand from the menu listed when users navigate to the Brand page by tapping on the “Brands” tab. Let’s try tapping on each brand to get an overall feel for each page tap on “Nike”, “The North Face”, or “Puma”.

Each brand page that you visit will show off a personalized header based on the retailer you tapped on letting the user know what they tapped on. From there you as the user are offered three categories of shop for product sizes for hoodies, tops, or bottoms. Your choice will display different products and sizing compared to the retailer’s size chart.

View Personal Size

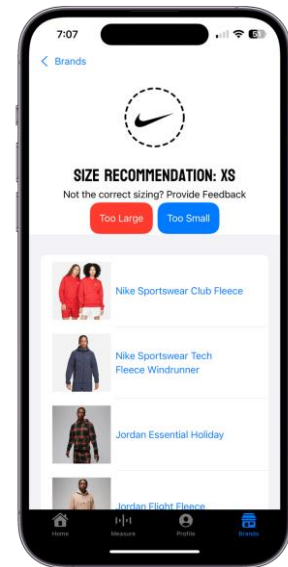

Let’s tap on “Nike” to get an overall feel of the retail page. From the retail page let us shop for hoodies tap on “Hoodies” you as the user will be navigated to the product page where you will find the page loading products. In the meantime, let’s focus on the “Size Recommendation: XS”. This is the subject to change based on the measurements you have saved on your personal profile. You will be recommended sizing for each brand and category of product from XS to XL. You will also notice there is a feedback bar underneath, if you find that the recommendation doesn’t fit, you may tap either “Too Large” to decrease the size recommended or tap on “Too Small” to increase the size recommended.

View List of Products

Once a brand has been chosen and the size recommended is satisfied. The product page will be filled with retail products directly from the retail website recommended to the user based on the category chosen. Let's tap on "Hoodies" on the brand page for Nike, there you will see a loading symbol which is fetching products to display. Once all products are displayed you may tap on any you might want to check out and purchase. Tapping on any product will open your default browser on your smartphone navigating a link to the product page on the retailer's website.

The list of products on each of these pages is always ever changing based on what is offered on the website. So be sure to check out these product pages when you can shop for new and exciting products from your favorite retailers.

4.7 Settings

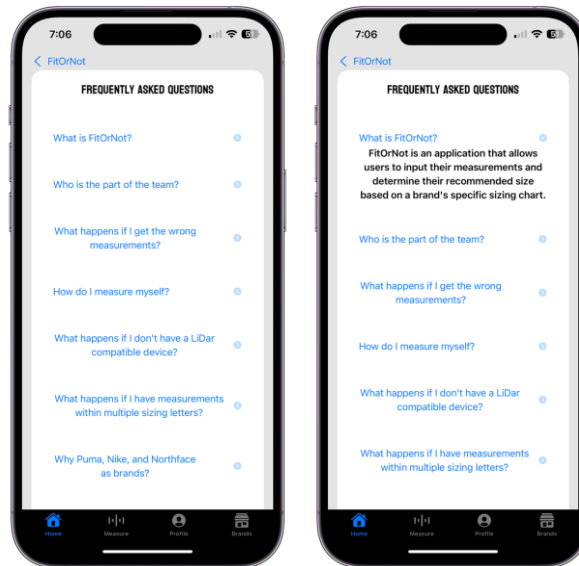

The settings page is home to everything account related from looking up answers to your most desirable questions to signing out of an account or to simply stop using the FitOrNot mobile application and deleting your account data.

FAQ

To access the FAQ page to find answers to your questions you can navigate here by tapping on the settings cog icon anywhere on the application where you can find the top bar.

Once you have found the top bar and tapped on the settings cog icon your screen will navigate to the settings page where you will find two sections "Community" and "Account" we will focus on community. Tap on the "FAQ" text link to navigate to the FAQ page where all the frequently asked questions will load up. To see an answer to any of your questions tap on any question for a drop down to display that answer. Tap on the question again to hide the answer.

Account

Lastly, for the account section on the settings page users have the option of either signing out of an account or if they feel that they've experienced everything and want to delete their account they will be able to. Once an account has been deleted everything from an email address to your personal measurements will be gone. To utilize the FitOrNot mobile application and all its features' users will need to sign up again.
